

TABLE OF CONTENTS

DEDICATION	ii
ACKNOWLEDGMENTS	iii
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF EQUATIONS	ix
LIST OF ABBREVIATIONS	x
ABSTRACT	xii
CHAPTER 1: INTRODUCTION	1
1.1 Motivation	1
1.2 Case Study: Estimating Population at risk in Borno State, Nigeria	4
1.3 Research Framework	6
CHAPTER 2: BACKGROUND AND LITERATURE REVIEW	8
2.1 The Boko Haram Insurgency	8
2.2 Breeding Ground for Terrorism	10
2.2.1 Ethno-Political and Religious Tensions	11
2.2.2 Topography and Economic Development	12
2.3 Counter-Insurgency Operations and Issues	15
2.4 The Strategic Importance of Nigeria	16
2.5 Understanding Terrorism through GIS	17
2.6 Estimating Population at Risk	20
2.6.1 Population at Risk for Disaster Response	20
2.6.2 Population as Indicators of Risk for Terrorism	21
2.6.3 Defining the Spatial Extent of Terrorism Effect	22
	iv

2.7 Challenges within Data poor environments and Uncertainty in Variables	22
CHAPTER 3: METHODOLOGY	24
3.1 Methodology Framework	24
3.1.1 Research Hypotheses and Variable Summary	26
3.2 Study Area and Unit of Analysis	27
3.3 Data Sources and Variables	30
3.3.1 Data Prep with ArcGIS	30
3.3.2 Dependent Variable – Boko Haram Attacks	31
3.3.3 Independent Variables – Sources and Preparation	33
3.3.3.1 Population Data	34
3.3.3.2 Populated Places	35
3.3.3.3 Road Data	36
3.3.3.4 International Borders	36
3.3.4 Strengths, Assumptions and Limitations	36
3.4 Exploratory Methods	38
3.4.1 Identifying Boko Haram Attack Patterns over Space and Time	38
3.4.2 Dasymetric Mapping	42
3.4.3 Exploring Independent Variables	45
3.4.3.1 Cost Surface	46
3.4.3.2 Population Variables	46
3.4.3.3 Populated Places	46
3.4.3.4 Roads	47
3.4.3.5 International Borders	48

3.4.3.6 Distance from Prior Attacks	48
3.5 Identifying Terrorism Risk through Cox Regression	48
3.5.1 Testing the Risk Terrain Validity	50
3.6 Estimating Population at Risk	51
CHAPTER 4: RESULTS	52
4.1 Risk of Boko Haram Conflict Analysis Using Cox Regression	52
4.1.1 Hypotheses Results	55
4.1.2 Visualizing Risk	57
4.1.3 Classifying Risk	60
4.2 Testing the Risk Terrain Validity	63
4.3 Estimating Population at Risk	67
4.3.1 Population and Risk Overlays	68
CHAPTER 5: DISCUSSION AND CONCLUSIONS	72
5.1 Key Observations and Value	72
5.2 Contrast with Previous Studies	76
5.3 Recommendations for Future Research	77
REFERENCES	80
APPENDIX A: Attribute Fields and Descriptions for ACLED Dataset	85
APPENDIX B: ACLED Data Spatial Autocorrelation Report	86
APPENDIX C: Cox Regression Outputs from SPSS	87

LIST OF TABLES

Table 1: Independent Variable Summary	27
Table 2: LGA Area, Population and Density Estimates	29
Table 3: LGA Area, Population, and Density: Mean, Max, and Min	29
Table 4: Attacks by Year	39
Table 5: Time Periods for Risk Terrain Validity Testing	51
Table 6: Cox Regression Results: Estimating Risk of Boko Haram Conflicts	53
Table 7: Estimated Relative Risk Classes and Definitions	60
Table 8: Attacks by Year Represented in Each Risk Class	67
Table 9: Population at Risk to Boko Haram Attacks by Risk Class	68
Table 10: Case Processing Summary	87
Table 11: Omnibus Tests of Model Coefficients	87
Table 12: Cox Regression Variable Results	88
Table 13: Correlation Matrix of Regression Coefficients	89

LIST OF FIGURES

Figure 1: Overview of Study Area – Borno State, Nigeria	5
Figure 2: The Boko Haram Crisis Overlaid on the Ethno-religious Landscape in Nigeria	14
Figure 3: High Level Methodology Framework	24
Figure 4: Map representing LGA administrative divisions of Borno State in Nigeria	28
Figure 5: Boko Haram Attacks from July 1, 2009 – June 30, 2014	33
Figure 6: 2014 Borno State Population Density by LGA	34
Figure 7: Attack and Attack Intensity Average per Quarter from July 2009 – June 2014	39
Figure 8: Spatiotemporal depiction of Boko Haram attacks by year July 2009 – June 2014	41
Figure 9: Mean Center Cluster of Boko Haram Attacks by Year: July 2009 – June 2014	42
Figure 10: Dasymetric Map of Population by Cell	45
Figure 11: Estimated Risk Terrain of Boko Haram Terrorism in Borno State 2009 – 2014	59
Figure 12: Classified Estimated Relative Risk Values for Boko Haram Terrorism	61
Figure 13: Overlay of Variables and Risk Class Terrain	62
Figure 14: Attack and Distinct Location Counts (Raw) by Year	63
Figure 15: Comparison of Year 3 Risk Terrain to Year 4 Attacks	64
Figure 16: Year 4 Risk Terrain Compared to Year 5 Attacks	65
Figure 17: Year 5 Risk Terrain Compared to Year 6 Attacks	66
Figure 18: Comparison of Risk and Population	69
Figure 19: High Risk/ High Populated Areas in Relation to Attacks, Roads, Major Towns	70
Figure 20: Hazard Function at Mean of Covariates	90
